### PRODUCT DESCRIPTION • PART# 128-0278

Mactech's portable and powerful Hydraulic Power Unit delivers the power you need in a convenient, lightweight package. The durable design provides superior control and produces less heat and noise than typical hydraulic power units. The VFD electric drive provides full amps throughout the adjustable speed range, so full torque is always provided to the hydraulic motor as the motor speed is changed. A 12 ft. remote pendant control with a 50 ft. extension and an emergency stop switch gives the operator full control over the power unit right from the working area.
