## REMOTE TRIPPER AND GUARDS CLAMSHELL LATHE ACCESSORY

MACTECHONSITE.COM

814LC Clamshell Lathe with Air Drive shown with Remote Tripper and Guard as example. Clamshell Lathe and Air Drive sold separately.

### PRODUCT DESCRIPTION

Improve the efficiency and safety of your LC or USS Clamshell Lathe with our Remote Air Valve with Tripper assembly and Guards. The remote air valve allows you to engage the tool block tripper, as well as the air feed to the drive, remotely without having to reach toward an operating lathe. The Guards provide extra visibility and a safety warning to increase protection from the rotating tool blocks as well as the drive gears. The remote air valve with tripper and the guards are available for the entire line of LC, USS Clamshell Lathes, and all Air Drive motors.

All dimensions and hydraulic requirements are for reference and may be subject to change without notice. Machine performance is subject to application and operator capability; please discuss your requirements directly with a Mactech sales representative. All information given and all sales made by Mactech Inc. are subject to their terms and conditions.

### FEATURES

- REMOTE TRIPPER VALVE AND AIR DRIVE CONTROL
- GUARDS FOR ALL LC AND USS CLAMSHELLS
- GUARDS FOR ALL IN-LINE, RIGHT ANGLE AND REVERSIBLE MACTECH AIR DRIVES
- INCREASED SAFETY AND VISIBILITY
- REDUCES PINCH POINTS
