

# MACTECH BOILER SERVICES

## MACTECH PORTABLE MACHINING SOLUTIONS

Mactech offers unique, time saving approaches to on-site applications such as steam drum hole drilling, manway resurfacing and welded tube stub removal in a variety of under pressure applications and industries.

### Waterwall Windows:

Once setup our waterwall window machine cuts a window in five minutes! Simply setup, cut, and remove the web. Then the necessary repair work or inspection can take place. For weld-up simply weld our pre-made coupons into place.

### Manways:

With our equipment we are able to machine elliptical and round manways (and doors) in-place. We can restore the gasket surface to its original condition.

### Hand Holes:

We reface, install, and convert elliptical, round, diamond, and square hand holes. Our equipment refinishes gasket seats in headers for hand hole caps to like new condition.

### Drilling:

Drilling new holes in drums or headers, repair of defective or leaking holes, counterboring drums or adding serrations for tube rolling are just a few of the many set-ups available. We perform work on virtually any size drum or header and perform radial, non-radial, inside or outside drilling.
