# Case Study

U.S. BANK STADIUM DOOR PEDESTALS – SKOLVIKINGS!

## **Project Description**

The Minnesota Vikings have to notify the NFL at least 90 minutes before game time if the doors to the new U.S. Bank Stadium will be open or closed during the game. That is a little less time than a recent contractor gave Mactech for a critical machining project on the door assemblies at the new stadium, but not by much.

## Mactech's Value Added to the Project

Mactech received an inquiry that the main pedestal areas where the bearings for the doors fastened needed to be machined in-place. With a large construction job underway, and no time to waste before the season started, time was of the essence. With a 30" pillar located in the center of the area in question, the surface to be machined was from 40" diameter out to 80" diameter. Mactech was on-site the next morning to walk it down and review the technical details of the project. There was an upper and a lower surface for the five doors of the stadium, making ten total areas. Tolerances were tight as they didn't want to have to shim the bearings in any way upon installation.

## **Equipment Used**

In short order, two 48" clamshell lathes were outfitted with reinforcing back plates, dual-set locators for fastening and adjusting the machine, and extended reach and travel single point slides. All ten surfaces were completed on schedule with a surface finish better than 125rms and flatness of less than .005"TIR or better on all surfaces.

### **Results**

Mactech's precision field machining work will ensure that Viking's fans don't "blow the doors off" the stadium when they are cheering their team to victory. Here's to a great football season ahead. Skol Vikings!

Thanks to Vikings Fan, and friend of Mactech, Mike Bremer for the Stadium Pics. Check out his show "Take a Hike, Mike" on Hasting Community TV.

## THE INDUSTRY LEADER IN FIELD MACHINING SOLUTIONS

Mactech is the leading global provider of machining tools, technologies and on-site solutions for the industrial machining industry.

#### **WE DEVELOP**

tools AND technicians tailored to meet the needs of the industry

#### **WEARE**

adaptable for any circumstance

#### **WE FOLLOW**

a "Solutions" approach

#### **WE CREATE**

quality, reliability, innovation

#### **EXPERIENCE**

40+ Years of Experience in a variety of advanced industrial situations

### **EQUIPMENT**

OEM of equipment Well maintained inventory

#### RESPONSIVENESS

24/7 - 365 Support Systems and processes adaptable to customer

#### **TECHNICIANS**

Talented techs with a wide array of field machining experience

#### **TOOLING**

Tooling and equipment can be customized for a specific job quickly

#### **TRAVEL**

Worldwide support
Experienced Traveling
Technicians
